MEDICAL SCHOOL AND HOSPITAL

FOUNDED IN 1882.

A CLINICAL SCHOOL FOR GRADUATES IN MEDICINE AND SURGERY

The New York Polyclinic is a school for teaching graduates the most recent methods of diagnosis and treatment in every department of medicine. The clinical material is abundant and the Hospital wards adjoin the lecture-rooms. Since the fire of 1896 a new building has been erected and thoroughly equipped, and the institution is now prepared to offer better facilities than ever. Students may enter at any time.

Special arrangements will be made for physicians living in or near New York City who may desire post-graduate work.

PREFACE.

In presenting this second volume of the Medical Directory of New York, New Jersey and Connecticut, attention is called to the fact that the title does not indicate the full scope of the work. This is not merely a directory, giving only such information as is absolutely demanded in a book of its class ; it is much more—it is a useful reference handbook for the physician, though containing nothing that actual experience has not demonstrated to be of value in the daily work of the general practitioner.

An effort has been made to give the society memberships and hospital appointments in detail, and to do this with equal care and fulness for the rural, as for the city physician. A few persons have expressed the opinion that this is superfluous. It is true that, from the standpoint of economy, such a plan is anything but commendable, but surely those who cannot see the value of such data have missed one of the important functions of a medical directory, viz.: to supply information concerning the special lines of work in which physicians are interested or anxious to make themselves proficient. Such knowledge is of value, not only to members of the medical profession, but to commercial houses desirous of bringing their goods to the attention of certain classes of practitioners.

The street lists of physicians afford a ready means of finding a near-by professional brother when assistance is needed, or when it is desired to refer a distant patient to him for emergency calls. Similarly, the lists of summer residences will be found a convenient guide at the season of the year when both patients and physicians are taking their annual outing. So far as it has been possible to obtain them, the names and addresses of all legally qualified practitioners of medicine in the three States have been given a place in this directory.

The distinguishing features of the present volume are : (1) An official list of the pharmacists registered in Greater New York;

(2) a complete alphabetical index of the regular physicians of the three States, giving their street addresses in the larger cities; (3) a list of the Health Board Stations in Greater New York at which antitoxin and culture outfits may be obtained; (4) information regarding the medical societies, hospitals and such benevolent institutions as have a bearing on medical work, and (5) a very full Index.

In conclusion, the Committee desires to express its obligations to the business houses who, by their advertisements, have helped to make the publication of this work possible. In justice to them it is earnestly hoped that every one interested in this directory will make it a rule to look *first* among its advertisements, and also let the advertiser know why he is dealing with him instead of with another who may be equally good.

The duration of human pregnancy is about 275 days. This is subject to some variation, and the longest period is still undetermined. As labor occurs in the larger proportion of cases between 270 and 290 days from the last menstruation, it is usual to reckon either from the first or last day of this period, taking as the mean 280 days, or a little over nine calendar months. For this approximate calculation the first day of the menstrual period may be used as being more readily ascertained. The table presents at a glance the beginning and end of 280 days for every day of the year. Find the date of menstruation in the upper line of the horizontal row, and the figure below, with the corresponding month, will indicate 280 days. In leap year, if the period of pregnancy includes February, the time for labor will be one day earlier than that given in the table.

LEGAL DUTIES OF PHYSICIANS, MIDWIVES, UNDERTAKERS AND CEMETERY KEEPERS, AND REGULATIONS OF THE HEALTH DEPARTMENT RELATING THERETO.

LEGAL DUTIES OF PHYSICIANS.

1. All physicians practicing in New York City (including those in public institutions) must be registered with the Health Department. (San. Code, § 5.)

due to a contagious or infectious disease, within twenty-four hours. (San. Code, § 146.)

3. If a person dies from criminal violence, or by a casualty, or suddenly when in apparent health, or when unattended by a physician, or in prison, or in any suspicious or unusual manner, the case must be referred to a Coroner. (Chap. 410, § 1773, Laws of 1882.)

4. Physicians must report, within twenty-four hours after making a diagnosis, every case of cholera, yellow fever, smallpox, chickenpox, diphtheria (including membranous croup), typhus fever, typhoid fever, relapsing fever, scarlet fever or measles occurring in his practice (San. Code, §§ 5 and 145.)

2. Certificates of death will be returned for additional information, which give any of the following diseases, without explanation, as the sole cause of death: Abortion, Cellulitis, Childbirth, Convulsions, Erysipelas, Gangrene, Gastritis, Hemorrhage, Meningitis, Metritis, Miscarriage, Peritonitis, Phlebitis, Pyæmia, Septicæmia, Tetanus.

(Any one of these may be the result of an injury, and thus be a subject for investigation by a Coroner. If it is not, the certificate should make that fact plain.)

3. No certificate will be accepted which gives a mere symptom as the sole cause of death (such as "asphyxia," "debility," "dropsy," "heart failure," etc.), unless accompanied by a satisfactory written explanation.

4. Certificates containing palpable errors of name, date, etc., or which are illegible, will be returned, and a new certificate required, as no corrections, erasures, or interlineations will be permitted.

(These certificates are permanent records of great legal importance, and it is necessary that they should show upon the face that they are original records, and have not been tampered with.)

N.B.—Physicians are particularly requested to make their reports of the cause of death as full and accurate as possible, in order that the records of this office may be of statistical value to the medical profession and the public.

Midwives.

LEGAL DUTIES OF MIDWIVES.

1. All persons practicing midwifery in the City of New York must be registered with the Health Department. (San. Code, § 5.)

(Call in Burial Permit Room, S. W. cor. 55th st. & 6th ave., between 9 A.M. and 4 P.M.)

Undertakers.

LEGAL DUTIES OF UNDERTAKERS.

1. Every undertaker in the City of New York must be registered with the Health Department. (San. Code, § 172.)

2. The body of a person who dies in this city shall not be buried without a permit from the Health Department. (San. Code, §§ 170 and 174.)

(Permits are issued in the Burial Permit Room, S. W. cor. 55th st. & 6th ave., between 7 A.M. and 6 P.M. on week-days, and 8 A.M. and 5 P.M. on Sundays and legal holidays. At other hours, if absolutely necessary, they can be procured in the office of the Division of Contagious Diseases, on the same floor.)

3. No dead body shall be retained unburied more than four days (excepting in the public morgue) without a permit from the Health Department, specifying the length of time it may remain unburied. (San. Code, § 177.)

(Such permits must be countersigned by the Sanitary Superintendent or Assistant Sanitary Superintendent.)

4. No dead body shall be transported from or in the City of New York, without a permit issued by the Health Department, or by the health officer of any other place in this State, where such death may have occurred; provided that the same effect shall be given to transit permits issued under the Laws of the States of New Jersey and Connecticut as to a permit issued by the City Health Department. (San. Code, § 174.)

5. No dead body shall be removed from one part of the city to another without a permit from the Health Department. (San. Code, § 174.)

(The only exceptions allowed are the removal of so-called "Coroner's Cases" on a Coroner's permit, and the removal of bodies from hospitals to the morgue by the public authorities.)

6. There shall be no public or church funeral of any person who has died of small-pox, diphtheria, scarlet-fever, yellow fever, typhus fever or Asiatic cholera. (San Code, § 156.)

7. The body of a person who has died of any of the diseases above mentioned, or of measles, must be disinfected and wrapped in a sheet saturated with a disinfecting solution* and put in a permanently sealed casket or coffin. (San. Code, § 155.)

* Disinfecting solutions recommended by the Board of Health are (1) six ounces of carbolic acid in one gallon of hot water; (2) sixty grains of corrosive sublimate and two tablespoonfuls of common salt in one gallon of hot water. The latter should not be kept in a metallic vessel.

Rules and Regulations of the Health Department Relating to Undertakers.

BURIAL PERMITS.

1. No burial permit for a person deceased in New York City will be issued excepting in exchange for a proper certificate of death.

(If a permit already issued has been lost or mislaid, a duplicate will be issued only in exchange for an affidavit of the undertaker that the first one has been lost, and that, if found, it will be returned to the Health Department.

If duplicate permits are issued for the same case, the one that is not used must be returned to the Health Department.)

2. Certificates of death must be filled out with black ink.

3. No certificate will be accepted which has been corrected, interlined, or altered in any way so as to change its meaning. (See, also, Rule 2 for physicians.)

4. No certificate will be accepted which has been imperfectly filled out (except for foundlings or the unknown dead), or which is illegible.

(If all the information called for by the headings cannot be obtained, the corresponding space should not be left blank, but should contain the word "unknown" or "not known," etc.)

5. Coroner's certificates must bear the stamp of the Coroner's office before permits will be issued therefor.

6. No earth burials are allowed below 130th st. No vault below that street shall be opened for the deposit of a body, without the approval of the Sanitary Superintendent or Assistant Sanitary Superintendent.

7. If a permit is issued for burial in the City Cemetery, the coupons are removed and retained by the Bureau of Records. If a change in the place of burial renders it necessary to have the coupons, they can be procured at the Permit Office on showing the original permit and making a written statement of the change.

(Every change in the place of burial from that originally given when the permit is issued, must be reported at the Burial Permit Office, and the permit altered by the clerk, and not by the undertaker, as the place of burial constitutes an important feature of the permanent record.)

TRANSIT PERMITS.

For persons who die outside of New York City.

1. Transit permits will be issued for the burial in or passage through the city of bodies of persons who die outside of New York City only in exchange for the papers and evidences of identity and of the cause of death which have accompanied the body from the place of death, and upon a written statement (on blanks furnished by the Department) of the persons applying for such permits.

2. Such permits will be required in every case, excepting when the body is accompanied by a permit issued by the proper health officer, under the laws of the State of New York, New Jersey or Connecticut, a transit permit issued in either of those States having the same effect in New York City as one issued by this Department.

3. Transit permits will not, in any case, be issued in advance of the arrival of the body, whether by ship, boat, or railroad, nor will such permit be issued when the death was due to yellow fever, Asiatic cholera, or smallpox, excepting by express permission of the President of the Department, or of the Medical Commissioner, on personal application to him.

4. Transit permits will be issued for the removal of a dead body from one portion of the city to another, for the convenience of the family or the undertaker. Such permit will have no coupons, and must be returned to the Health Department when the burial permit is applied for.

MEDICAL LAWS OF NEW YORK.

For full text see Vol. I., 1899, page 254.

SUMMARY OF REQUIREMENTS FOR LICENSE.

All requirements for admission should be completed at least one week before examinations.

They are as follows:

1. Evidence that applicant is more than 21 years of age (Form 1).

2. Certificates of moral character from not less than two physicians in good standing (Form 2).

3. Evidence that applicant has the general education required, preliminary to receiving the degree of bachelor or doctor of medicine in this State (medical student certificate).

4. Evidence that applicant has studied medicine not less than four full school years of at least nine months each, including four satisfactory courses of at least six months each, in four different calendar years in a medical school registered as maintaining at the time a satisfactory standard. New York medical schools and New York medical students shall not be discriminated against by the registration of any medical school out of the State, whose minimum graduation standard is less than that fixed by statute for New York medical schools.

The increase in the required course of medical study from three to four years does not take effect till January 1, 1898, and does not apply to students who matriculated before that date and received the degree of M. D. before January 1, 1902 (Form 1).

First exemption: "The regents may in their discretion accept as the equivalent for any part of the 3d or 4th requirement, evidence of five or more years reputable practice of medicine, provided that such substitution be specified in the license."

5. Evidence that applicant "has received the degree of bachelor or doctor of medicine from some registered medical school, or a diploma or license conferring full rights to practice medicine in some foreign country" (Form 3 or original credentials).

6. The candidate must pass examinations in anatomy, physiology and hygiene, chemistry, surgery, obstetrics, pathology and diagnosis, therapeutics, practice and materia medica. The questions "shall be the same for all candidates, except that in therapeutics, practice and materia medica all the questions submitted to any candidate shall be chosen from those prepared by the board selected by that candidate and shall be in harmony with the tenets of that school as determined by its State board of medical examiners."

Second exemption: "Applicants examined and licensed by other State examining boards registered by the regents as maintaining standards not lower than those provided by this article, and applicants who matriculated in a New York State medical school before June 5, 1890, and who received the degree of M. D. from a registered medical school before August 1, 1895, may without farther examination, on payment of $10 to the regents and on submitting such evidence as they may require, receive from them an indorsement of their licenses or diplomas, conferring all rights and privileges of a regents' license issued after examination."

7. A fee of $25 payable in advance.

Further information relating to State examination in Medicine and Dentistry, etc., may be obtained from Melvil Dewey, M. A., Albany, Secretary of the Board of Regents of the University of the State of New York.

ADMISSION.—Apply to any city magistrate or at the House of Reception at any hour. Truant and disobedient children, and such as require discipline for any cause, between the ages of seven and fourteen years, belonging to the city of New York, are admitted into the Asylum on an order from a city magistrate or a surrender from parents or guardians. The courts commit children to the Asylum between the ages of six and sixteen. When parents or guardians desire to surrender children, it is only necessary to bring them to the House of Reception, and sign the proper form of surrender. Children having no friends to care for them, or whose friends choose to give them up wholly to the care of the Asylum, are provided with homes in the country. Children are kept but a few weeks at the House of Reception, before being sent to the Asylum. While in the latter they attend school daily.
DISCHARGE.—The term for which children are detained in the Asylum depends on their improvement and reformation. No uniform time can be fixed for the attainment of these ends, but observation and experience have taught that, in a majority of cases, it should be from one and a half to two years. Applications for discharge should be made at the office of the House of Reception.
VISITING DAYS.—While at the House of Reception, children may be visited once a week, on any day but Sunday, between the hours of 9 and 12, and 2 and 4. For children at the Asylum the visiting day is the last Thursday of each month. In case of the serious illness of a child, its friends are informed of the fact, and allowed to visit it.

STATE MEDICAL SOCIETY, THE NEW YORK ("The Medical Society of the State of New York").—Organized in 1806.

MEMBERSHIP.—The society is composed of delegates, permanent members, and honorary members. Each county medical society is entitled to as many delegates as there are assembly districts in the county of which it is the society. Each incorporated medical college which, by its charter, may be represented, is entitled to one delegate. The New York Academy of Medicine is entitled to five delegates. Incorporated voluntary medical societies which have been in existence three years, having not less than fifteen members who are also members of a county medical society holding regular meetings through the year, and whose by-laws conform with those of the State Society, are entitled, if admitted to representation, to one delegate. Application for representation must be made three months before it is acted on by this society, which must receive a report, recommending their admission as worthy and desirable, from the Committee on Ethics, to which such application shall be referred. Delegates who have served as such for three years, during which they have attended and registered at two annual meetings of the society, become eligible for election as permanent members. The society may, at the annual meeting, elect eminent physicians from other States, or from foreign countries, as honorary members. They must have been nominated at a previous annual meeting, and not more than six shall be elected in any year.

***NEW JERSEY ACADEMY OF MEDICINE.**—Meetings are held on the third Wednesday afternoon of the month.

NEW JERSEY, THE MEDICAL SOCIETY OF.—Organized in 1766. Received its first charter June 2, 1790. This act expired by its own limitation in 1815, and a new act of 1816 provided for a District Society in each county, to make their own laws and regulate their own concerns, provided they were not contrary to the Constitution of the State Society. This charter was not acceptable to the profession, and in 1818 a supplement was passed, providing that the society should be composed of four delegates from each District Society which were or might hereafter be formed, who, with the officers for the time being, should constitute the society.

This supplementary act, constituting the society by delegates of the local societies, placed it upon a new basis and secured the cordial sympathy and co-operation of the physicians of the State. The State Society was thus made the creature of the local societies, and derived its life from their delegates annually elected. The mode of constituting the society has undergone no substantial change since 1818. In 1864 the society, desirous of surrendering "all its special privileges and pecuniary immunities, and to reorganize, as nearly as possible, upon the voluntary basis," applied for and obtained its present charter, which went into effect on its centennial year, 1866.

MEETINGS.—The annual meeting is held in the first week of June, and the place is chosen by the society at its previous annual meeting. Meets on June 4, 1901, at Allenhurst.

UROTROPIN

UROTROPIN is a most efficient diuretic, urinary antiseptic, uric acid solvent, and remedy for calculous disease, rapidly rendering alkaline and putrid urine containing mucus pus, uric acid, and amorphous urates normal in appearance and reaction. It sterilizes the urine, increases its quantity, and dissolves calculi and deposits. It is of exceptional value as an antidote to urinary poisoning in all suppurative diseases of the genito-urinary tract, as in chronic urethritis and prostatitis, calculous disease, pyelitis, cystitis with ammoniacal decomposition of the urine, and also in gouty and rheumatic affections where active elimination of uric acid and the urates is required. It is also very useful to quiet the irritable bladders of diabetics. It has been extensively employed with most excellent results preparatory to operative procedures upon the urinary organs, since it sterilizes the urine and prevents infection of the wound. Its excellent effects in chronic phosphaturia have been testified to by **Drs. Windell** of Louisville, **Allison** of Omaha, and **Professor Casper** of the University of Berlin. Extremely favorable reports of its efficacy have been published by **Professors Nicolaier, Heubner, Wilcox, McGee, Horwitz,** and **Elliott, Drs. Brewer, Cohn, Flexner, Thompson, Richardson, Ehrmann, Howland,** and many others.

DOSE For adults, 7½ grains two or three times daily, best administered in half a pint of plain or carbonated water. Much larger amounts can be given when indicated, however, up to 60 grains or more daily.

UROTROPIN, prepared by the **Chemische Fabrik auf Actien, formerly E. Schering,** of Berlin, Germany, is supplied in half-ounce and one-ounce vials and in the form of half-gram tablets (7½ grains each), in paper boxes of twenty tablets.

Physicians are requested to see that the preparation used bears the names of E. Schering, Berlin, and our own, which is a guarantee of its absolute purity.

MALTINE

IS A HIGHLY CONCENTRATED EXTRACT OF BARLEY, WHEAT AND OATS

Maltine

MALTINE is rendered particularly delicious and refreshing if administered with any of the aerated waters, milk, wine or spirits. Thus *a pleasing change is afforded* to capricious or fastidious invalids.

MALTINE, aside from its great nutritive value, is so rich in Diastase that a dose *readily digests all the starchy food*, such as bread, potatoes and cake, which the average adult eats at a single meal.

There are few useful products that have been more numerously and less successfully imitated . . . than . . .

Brush's Kumyss

The same word, often the same lettering as directions on the label, the same colored ink, and sometimes a device that imitates closely the trade-mark, may cover a base imitation.
*Only the word "***Brush***" will make your order definite.*

Milk

Every common-sense detail possible to observe is practised in Dr. Brush's milk dairy. Only the milk of the cows in perfect health at the time of milking—nothing but whole grist of the best grain—no refuse of any kind used as food —all the care and attention to the cows is given with an intelligent desire to produce "good" milk that can be fed to the baby "fresh."
